

Statistics 418: Tools in Data Science

Summer 2026

Lectures: Monday and Wednesday 6:00 - 7:50pm. June 22 to July 29. Room PAB 1749.

Instructor: Christopher D. Barr, cdbarr@gmail.com. Office hours by appointment.

Prerequisites: Statistics 404 and Statistics 405

Software:

- *The required software for the course is the freely distributed software package RStudio (R). You may download it from posit.co (both Mac and Windows versions available). We will also use: Tableau (free student licenses at tableau.com/academic/students); and Claude Desktop. Key R packages include `sqldf` and `ranger`.*

Grading:

- *Attendance and Participation (30%):* You may miss only 1 class. Please make an effort to speak at least once per class.

- *Homework (20%):* Nine short assignments. Each assignment has three sections: a *Review* section covering the class just completed, a *Preview* section preparing you for the upcoming class, and a *Project* section that advances your final project in small, steady increments. Homework is assigned at the end of class and must be emailed to me before the start of the next class. You are allowed and encouraged to discuss with peers, but write your own work. No late homework will be accepted.

- *Midterm (20%):* Given in class on Wed Jul 15.

- *Final project (30%):* Due Wed Jul 29

Honor Code:

- *Remember that your work must be your own, except when specifically stated otherwise. Plagiarism and cheating will be swiftly dealt with to the full extent allowed under UCLA policies.*
